methods that will promote the welfare of all children in Torrance. As everyone knows, the growth of Torrance in the past ten years has been stupendous and re-vamping an educational program to meet the needs of today, such as building new schools and integrating new teachers into new schools, has been all but a modern miracle.

"... I have no ax to grind or anything to gain personally. People who know me will testify that I have a mind of my own and am nobody's YES man. If elected, I will

needs of the students. Report cards and grades should be used from the first grade on. Children need an incentive and should be prepared for the competition of adult life.

Proper discipline of study should be emphasized and "social adjustment" held in proper perspective. Let teachers teach their

devote myself not only to keeping our schools at their present fine rate of development, but to further their progress in the best interest of our children."

mapor fields.

The recommendations of the Citizens' Committee, as published, should be followed.

No closed meetings of the School Board should be held, the public being invited to all meetings by published announcement in all area newspapers.

Emphasis on economy of operations and in building program.

Fair and equitable compensation for all employees of the School District.

The entire program should be based on the primary purpose of our schools: A well rounded preparation for life for all students.

National Supply Workers Make RC Fund Donation

Employees of National Supply Company made a pace-setting gift to the Torrance Branch Red Cross Fund last week, according to Wally Haas, chairman of the commerce and industry division of the local appeal.

Paul Nystrom, who is one of nine area Red Cross campaigners, accepted a check for \$500 from Gordon Paulsen, chairman of the firm's employees' club.

Paulsen explains that the

purpose of this club is to provide funds for unified employee contributions to public charities and to maintain a financial foundation for in-plant welfare assistance, and recreational programs.

Paulsen said that since the founding of the National Supply employees' club in 1950, over \$92,000 has been given to recognized public charities and some \$44,000 has been contributed to promoting employee welfare assistance.

Stevens' Testimonial Dinner

(Continued from Page 1)
affairs of our city through one of the most trying boom periods any city has experienced," he added.

Stevens came to Torrance from Culver City in 1948 after the voters of the city had approved a city manager form of government at the polls the preceding fall.

CENSUS
A special census conducted in Torrance in 1957 credited the city with 13,160 residents. Another census taken the following year on the recommendation of the new city manager boosted the population count to 17,450.

By 1950, the population had grown to 22,241; to 31,834 by 1952; 67,459 by 1955; and past 90,000 by 1957.

In the 1960 Federal census, Torrance was officially credited with a population of 100,635, and the County Regional Planning Commission now estimates that more than 105,000 persons reside in the city.

"Through all of this unprecedented growth, Stevens has maintained the city on an even keel, has provided services demanded by the mushrooming residential areas, and has kept the city on a sound financial footing with relatively minor increases in the tax burden," Blount said.

Improvements

(Continued from Page 1)
City of Torrance has already carried out some excavation work as a result of an earlier agreement with the Flood Control District. That agreement provided for the two agencies to share cost of the right of way acquisition, with the District putting up \$415,000, or about 80 per cent of the land cost, Chace said.

Retention basin construction is part of the Walteria Lake Storm Drain which will be built as a part of the 1958 Bond Issue. Balance of the project consists of a pumping station and a drainage line across Hawthorne Boulevard to a junction with the existing Walteria Sump Storm Drain now being designed under the direction of the City of Torrance.

Supervisor Chace said the basin will be used for flood control and water conservation purposes. Water which has been collected will be allowed to percolate into the underground water table in the area.

CANDIDATES QUERIED AT 'KOFFEE KLATCH'

At 10:30 a.m., April 6 at the home of Mrs. John Robinson, 24219 Huber Ave., Torrance, a "Koffee Klatch" will be held for interested persons to hear comments from School Board candidates Bert Lynn, Pat Huber and Bill Hanson.

There will be a question and answer period, promised Mrs. Jack Cowger, a spokesman for the group.

roadway riding surface, more adequate area drainage, and reduced maintenance costs.

The improvement of Berendo Avenue, between 204th Street and Milton Street, Torrance, has been rescheduled by the Los Angeles County Road Department to begin this week, according to Supervisor Burton W. Chace.

Work will consist of extending the pavement to join curb and gutter recently constructed under permit by adjoining property owners.

The improvement will provide better drainage, better traffic facilities, and will generally result in increased property values, Chace said.

Construction of the drainage project will be supervised by M. E. Salsbury, Chief Engineer of the Flood Control District, Chace added.

OTHER PROJECTS
Other projects scheduled for the area include a boulevard stop sign that will be posted in a few days on Sunnyridge Road at its intersection with Eastvale Road in the Rolling Hills area.

New sign will require motorists traveling on Sunnyridge Road to stop before entering Eastvale Road, Chace said, pointing out that this sign is necessary because of the increasing traffic and the curve at this intersection.

The Supervisor also announced approval of plans for the improvement of Fejoa Avenue northerly of 254th Street, Lomita.

The project will consist of widening the west side of Fejoa Avenue to join the curb and gutter recently installed under permit by adjacent property owners. Construction dates will be scheduled by the Los Angeles County Road Department.

IMPROVEMENT
Completion of the work will provide an improved
